

## Profile

SAACKE QINGDAO MARINE BOILER CO., LTD. is a joint venture company formed between SAACKE GmbH Bremen, Germany and QINGDAO MACHINERY INDUSTRY GENERAL COMPANY, Qingdao, China, while SAACKE GmbH holds 87 % of the shares. The company is located in Industry Area of Qingdao Development Area, Qingdao, China, 7 kilometres from Qingdao Qianwan Port, 40 kilometres from Qingdao Liuting International Airport.

SAACKE QINGDAO MARINE BOILER CO., LTD has established an effective quality assurance system with strength in boiler manufacturing, furnished facilities and available measuring equipments. The company has supplied boilers of GL, DNV, LR, BV, ABS CCS class for ship owners all over the world and has received ISO9001:2000 Quality Management System qualification by DNV at the end of 2004.

## Boilers

### Auxiliary Boilers

- smoke, water, pin tube type
- horizontal or vertical
- top or side fired
- fuel oil MDO and HFO up to 700 cSt at 50 °C

### Exhaust Gas Boilers / Economisers

- smoke or water tube type
- finned or plain tube type
- horizontal or vertical

### Composite Boilers

- horizontal or vertical
- top or side fired
- fuel oil MDO and HFO up to 700 cSt at 50 °C

### Hot Water Boilers

- horizontal
- smoke tube type
- fuel oil MDO and HFO up to 700 cSt at 50 °C

On its production location, SAACKE QINGDAO MARINE BOILER CO. is manufacturing all types of marine boilers designed by SAACKE GmbH. The scope of supply includes oil-fired boilers, exhaust gas boilers, composite boilers as well as other related marine products.

## Quality

Our understanding of quality is to supply a product

- which fully corresponds with the requirements of our customers,
- which meets the valid regulations and technical rules,
- which fulfils economical criteria during operation.

Our production sites have all necessary approvals for manufacturing marine boilers and performing a systematic and testable work at high quality levels.

The practiced quality management system according to DIN EN ISO 9001 supports the monitoring of all quality related activities from engineering to manufacturing, testing, commissioning and to the service thus saveguarding the quality standards.
